🐙 RichieOrito
in Richard Orito

Highly skilled software developer with experience developing innovative and efficient software solutions. Adept at analyzing user requirements and developing software applications that meet or exceed user expectations. Skilled in developing, testing, and debugging software applications using a range of programming languages.

WORK EXPERIENCE

Safaricom PLC (September 15, 2022 - February 21, 2023)
Software Engineer Intern

During my internship as a software engineer at Safaricom PLC, I worked on a variety of projects and gained valuable experience in software development. I collaborated with senior developers and other cross-functional teams to design, develop, and test software solutions.

My responsibilities as a software engineering intern included:

- Writing and testing code
- Participating in code reviews
- Attending team meetings
- Collaborated with lead design of technology products and solutions to meet the needs of Safaricom PLC customers, obtaining the optimum balance between compliance to requirements and delivery times/costs.

Through my work as an intern, I developed a strong understanding of:

- Object-oriented programming concepts
- JavaScript programming language
- Agile software development methodology
- Overall, my experience as a software engineering intern at Safaricom PLC provided me with hands-on experience in software development, as well as an understanding of how a software engineering team operates within a larger organization.

Achievements:

- Played an integral role as a key contributor in the technical project design, review, and research process for the development and execution of a budget request and approval system.
- Provided valuable expertise and insights, guiding the project from ideation to implementation.
- Successfully launched the project, enabling the organization to streamline its budget management process and optimize resource allocation.
- Identified and resolved 20 bugs, resulting in a 10% improvement in product stability

SKILLS

Proficient in JavaScript, HTML, CSS, Python, Node JS

Basic understanding of server-side CSS pre-processing platforms, such as LESS and SASS.

Good understanding of asynchronous request handling, partial page updates, and AJAX.

Proficient understanding of cross-browser compatibility issues and ways to work around them.

Knowledgeable in system monitoring and alerting strategies

Proficient in implementing UI/UX design principles to create intuitive and user-friendly interfaces

Strong problem-solving skills and ability to analyze complex technical issues.

Excellent communication skills, both written and verbal.

Warm Invest (September 07, 2020 - September 14, 2021)
Software Developer Intern

- Worked in a team of developers to develop, test, and deploy software solutions for clients
- Participated in code reviews and made necessary adjustments to ensure code quality and consistency
- Collaborated with cross-functional teams to integrate software solutions into existing systems
- Assessed and mitigated risks associated with project development, deployment, and support.
- Setup and utilized development environments that ensured limited or no negative production impact.
- Collaborated with external business partners and software platform vendors on technical design and architecture.
- Assisted in process improvement initiatives within the team; worked closely with the software deployment and operations teams to ensure successful transition and implementations
- Designed solutions that met security, server capacity, performance, usability and data integrity requirements.
- Conducted software testing and debugging to ensure a high level of product quality

Achievements:

- Collaborated with senior developers to identify and resolve bugs in the codebase, contributing to the release of a stable and reliable software product.
- Conducted research and presented findings on the use of emerging technologies in the development of web applications, leading to the adoption of a new development framework and improving team efficiency by 25%.
- Assisted in the creation of user documentation and training materials, facilitating the onboarding process for new team members and improving the overall quality of customer support.

Experienced in using frameworks such as React JS, Express JS, Django and Flask

Proficient in databases such as PostgreSQL, MongoDB

Proficient with Object-oriented programming (OOP) concepts

Proficient with Version control systems - Git

Familiar with test-driven development (TDD) and experienced in writing unit tests using testing frameworks such as Jest and Mocha, ensuring code quality and reducing bugs during the development process

Familiar with design tools such as Figma

Ability to work collaboratively with cross-functional teams to achieve project objectives.

Good understanding of Project management and collaboration tools
