- Project Management.
- Web Design.
- Application Engineering.
- Network Configuration.
- Data Security.
- Linux
- Microsoft Office Suite.

Education

Bachelor of Science in Information Technology | Jomo Kenyatta University of Agriculture and Technology | September 2018 - Ongoing.

Kenya Certificate of Secondary Education | Highway Secondary School | February 2012 – November 2015.

Work Experience

Full Stack Developer, September 2020 – September 2021.

Warm Investments Ltd, Nairobi.

Reporting to the Managing Director, I performed front- and back-end operations on websites and computer systems to ensure they collaborated well with their design elements.

- Configured and developed standard applications according to development standards.
- Partnered with infrastructure teams to enable configuration and development.
- Setup and utilized development environments that ensured limited or no negative production impact.
- Identified and stored development logic and artifacts in a source repository.
- Assessed and mitigated risks associated with project development, deployment, and support.
- Analyzed business requirements and created detailed technical specifications from which applications/programs were to be written.
- Collaborated with external business partners and software platform vendors on technical design and architecture.
- Designed solutions that met security, server capacity, performance, usability and data integrity requirements.
- Handled workload and priorities to deliver agreed upon project milestones.
- Prepared and executed training of users and operations teams.
- Provided post-implementation support to operations team throughout the transition period.
- Assisted in process improvement initiatives within the team; worked closely with the software deployment and operations teams to ensure successful transition and implementations.

Achievement

- Introduced and successfully lobbied the board on the idea of investing in a web based platform to enhance our capacity to market. It was roundly accepted by the board and was implemented with subsequent setting of a website which would tell the world more about what we are and what we do.
